SC1000 | CLIMBER

The SC1000 offers smooth climbing with 20 speeds making it incredibly flexible for users who want gentle climbs or for those who want a high intensity workout. The wide steps offer a safe experience for the most demanding climbers.

EXTRA STEP. With this extra step on the side, we increase the user's safety when starting and stopping the exercise.

VISUAL SAFETY LINES. Each step has an orange visual line at the limit of the step to visually control the end of the step.

LED INDICATORS AND INTEGRATED CONTROLS. Includes visual gear indicators, integrated controls and pulse sensor.

S HOVENIA

TECHNICAL FEATURES - CLIMBER SC1000 MOVEMIA

- High-strength ST52 aluminium and steel structure, with high-end finishes on all internal components.

- Painted ABS plastic housing with a technology similar to that used in the automotive sector for high durability and resistance.

- Automatic emergency stop button for voltage.
- Heart rate sensors located on the handlebars; very accurate and large for ease of use.

- **Equipment for a tele-metric reading of the heart rate** by chest strap compatible with the most sold solutions on the market (strap not included).

LED DISPLAY

The DOT MATRIX display with top LED window graphically shows the exercise progress. The lower alphanumeric display gives user feedback before and after exercise. The lower 4-LED window shows simultaneous information on Speed, Time/Distance, Calories and Heart Rate.
Quick Start for quick start of training.

- USB port.
